AI Awareness Quiz – Answers 1 to 60

Section A – AI Companies & Latest Models

1. OpenAI
2. Anthropic
3. Google
4. Meta
5. xAI
6. France
7. GPT-6
8. GPT-6 Mini
9. Claude Haiku 5.5
10. Gemini 4

Section B – Generative AI & LLM Concepts

11. Large Language Model.
12. It's AI that creates brand-new content like text, images, audio, and video.
13. A prompt is the instruction you give to an AI model.
14. A system prompt sets the AI's role, behavior, and rules.
15. A hallucination is when an AI gives wrong or made-up information.
16. A token is a small chunk of text that an LLM reads and processes.
17. The context window is how much information a model can handle at one time.
18. Inference is when a trained model uses what it has learned to give predictions or answers.
19. Fine-tuning means training a model further on specific data so it does a particular task better.
20. Multimodal AI can work with different types of data at once, such as text, images, and audio.

Section C – Agents, RAG & Modern AI Development

21. An AI agent is a system that uses AI to carry out tasks and reach a goal.
22. A chatbot mostly just replies to messages, while an AI agent can actually take actions to get things done.
23. Retrieval-Augmented Generation.
24. RAG gives the LLM relevant outside information so its answers come out better.
25. An embedding is a way of representing data as numbers.
26. A vector database stores embeddings and lets you search through them.
27. Tool calling lets an AI model use external tools, APIs, or functions.
28. Model Context Protocol.
29. An API key proves who you are and gives you permission to use an API.
30. An agentic workflow is a process where AI agents plan and carry out several steps to finish a task.

Section D – AI Image, Video, Audio & Famous Tools

31. Images and digital artwork.
32. AI video generation.
33. GPT Image.

34. Creating images from text descriptions.
35. Creating videos from text descriptions.
36. Text-to-Speech.
37. Speech-to-Text.
38. OCR pulls text out of images and scanned documents.
39. A vision-language model can understand both images and text.
40. Voice cloning creates an artificial voice that sounds like a real person's voice.

Section E – Coding AI, Hardware & Practical Awareness

41. AI-assisted code writing and completion.
42. AI-powered coding and software development.
43. A tool that helps developers write, explain, debug, and improve their code.
44. GPU (Graphics Processing Unit).
45. Graphics Processing Unit.
46. Neural Processing Unit.
47. VRAM holds the data and model parameters that the GPU needs.
48. Running an AI model directly on your own computer or device.
49. An AI model whose trained weights are openly available to the public.
50. Model distillation passes knowledge from a bigger model to a smaller one.

Section F – Latest AI Awareness & 2026 News

51. GPT-6.
52. GPT-6 Astra.
53. Claude Opus 5.5.
54. Claude Haiku 5.5.
55. Gemini 4.
56. GPT Image.
57. GPT-Live.
58. Anthropic.
59. Indirect prompt injection.
60. Human verification helps catch errors, misinformation, and risky decisions.
